WEBSITE DESIGN & DEVELOPMENT SPECIFICATION

Primary Contact: Divvya — 7096962640
Expected Date of Delivery: [ ]

---

01. WEBSITE STRUCTURE

The website will consist of **three primary page types**.

PAGE 01 — HOME

A single-page scrolling homepage containing:

- Navigation
- Hero section
- [Additional sections as per supplied layout]
- Footer

Homepage reference:
https://professional.flos.com/en/global/bespoke/

PAGE 02 — PRODUCT INNER PAGE

There will be **ONE master product-page template**.

The CMS must allow the administrator to:

Add New Product → Enter Information → Upload Images → Publish

The system must automatically generate a new product page using the approved template.

New products must be added without developer intervention.

Product page reference:
https://professional.flos.com/en/global/subfamily/outdoor-in-ground-ingraze-frame/

PAGE 03 — CONTACT

The contact page will contain:

- Address
- Email
- Telephone
- Social media links
- Contact form

All content must be editable through the CMS.

Contact page reference:
https://onoklighting.com/en_US/contactus

---

02. DYNAMIC PRODUCT SYSTEM

The product catalogue must be **dynamic and scalable**. There must be no fixed limit on the number of products.

The CMS must allow the administrator to:

- Add, edit, duplicate and delete products
- Publish / unpublish products
- Show / hide products
- Reorder products
- Add, replace, delete and reorder multiple product images
- Edit product descriptions and information
- Add downloadable files
- Add related products
- Add SEO information

The administrator must be able to add new products without modifying code or creating new page templates.

---

03. CONTENT MANAGEMENT SYSTEM

The entire website must be manageable through a CMS. Ordinary content changes must never require access to the source code.

HOME

Editable:

- Text and headings
- Images and videos
- Product selections and order
- Buttons and links
- Section content
- Contact information
- Social links

PRODUCTS

Editable:

- Product names
- Descriptions
- Images
- Product information
- Downloads
- Related products
- SEO information

CONTACT

Editable:

- Address
- Email
- Telephone
- Social media
- Contact-form information

---

04. TYPOGRAPHY — FULLY EDITABLE

Typography must be controlled through a **centralised design system** and must not be individually hard-coded throughout the website.

The administrator must be able to edit:

Fonts

Primary Font: [ ]
Secondary Font: [ ]
Accent Font: [ ]

Fonts must be changeable without modifying website code.

Font Weights

The system must support the available font weights, including:

- Thin
- Extra Light
- Light
- Regular
- Medium
- Semi Bold
- Bold

Required initial weights: [ ]

Font Sizes

The following must be editable:

- H1–H6
- Body text
- Small text
- Caption
- Navigation
- Buttons
- Product titles
- Product descriptions
- Technical information

Initial sizes: [ ]

Other Typography Controls

- Line height
- Letter spacing
- Text colour
- Text alignment

---

05. GLOBAL COLOUR SYSTEM

A centralised colour system must be used.

Primary Background: [HEX]
Secondary Background: [HEX]

Primary Text: [HEX]
Secondary Text: [HEX]
Accent: [HEX]
Border: [HEX]
Button Background: [HEX]
Button Text: [HEX]
Hover: [HEX]
Active: [HEX]

All global colours must be editable.

Changing a global colour should automatically update all elements using that colour.

---

06. BUTTONS & LINKS

The following must be editable:

- Text
- Font
- Font size
- Font weight
- Text colour
- Background colour
- Border

---

07. IMAGES & MEDIA

The CMS must allow images to be:

- Uploaded
- Replaced
- Deleted
- Reordered
- Assigned to products
- Assigned to homepage sections

Images must be optimised for web performance.

---

08. VIDEO

If video is used:

Video Locations: [ ]

The system must support:

- Upload / embed
- Replace video
- Poster image
- Autoplay where specified
- Muted autoplay where specified
- Mobile fallback
- Responsive sizing

Video must not unnecessarily compromise website performance.

---

09. NAVIGATION

Navigation must follow the supplied design.

Navigation content and links must be editable through the CMS where applicable.

---

10. RESPONSIVE DESIGN

The website must be fully responsive.

Desktop: [ ]
Laptop: [ ]
Tablet: [ ]
Mobile: [ ]

Responsive layouts must be intentionally designed rather than simply scaling down the desktop version.

The following must be specifically adapted for mobile:

- Typography
- Navigation
- Images

- Product grids
- Spacing
- Buttons
- Animations
- Layout
- Horizontal scrolling
- Contact forms

---

11. SEO

The CMS must allow editing of:

- Page title
- Meta description
- URL slug
- Image alt text
- Open Graph title
- Open Graph description
- Open Graph image
- Canonical URL

Each product must automatically receive its own SEO-friendly URL.

Example:
`/products/[product-name]`

The website must also include:

- XML sitemap
- Robots.txt
- Proper heading hierarchy
- SEO-friendly URLs

---

12. PERFORMANCE

The website must be optimised for speed and Core Web Vitals.

Requirements:

- Optimised images
- Responsive image loading
- Lazy loading where appropriate

- Optimised fonts
- Efficient code
- Minimal unnecessary plugins/scripts
- Caching
- Compression

A performance test/report must be provided before final handover.

---

13. BROWSER & DEVICE COMPATIBILITY

The website must be tested on current versions of:

- Google Chrome
- Safari

And on:

- Windows
- macOS
- iOS
- Android

---

14. CONTACT FORM & EMAIL

Primary Email: [ ]
Secondary Email: [ ]

The developer must configure:

- Email / SMTP service
- Spam protection
- Form validation
- Error handling
- Success confirmation

The complete submission process must be tested before launch.

---

15. SOCIAL MEDIA

Instagram: [ ]
LinkedIn: [ ]
YouTube: [ ]

Social links must be editable through the CMS.

---

16. ANALYTICS

The website should support:

- Google Analytics
- Google Search Console

All tracking codes and account access must be documented and handed over to the client.

---

17. SECURITY & BACKUPS

The developer must implement:

- SSL
- Secure CMS configuration
- Secure administrator login
- Spam protection
- Regular backups
- Software/plugin updates
- Protection against common vulnerabilities

Backup frequency: [ ]

---

18. ACCESS & OWNERSHIP

The client must receive full administrator access.

The developer must not retain exclusive access to:

- CMS

- Hosting
- Domain
- Database
- Source code
- Analytics
- Email service
- Third-party services

Upon completion and final payment, the client must receive access to the complete website source code and project files, subject to separately licensed third-party software.
